## Language Laboratory

English is a language of opportunities and it plays a prominent role in securing desirable employment for engineering graduates. Accuracy and fluency in the use of language is very essential in the corporate world. Engineers who work globally have English as the only means of communication.

Besides the use of English, it is also very important for engineering graduates who prepare for various competitive examinations such as TOEFL, IELTS and GRE. In the modern era, technology aided learning has been playing a pivotal role in the pursuit of language acquisition. Therefore, keeping in view desperate need of English for engineering students, the institute has installed Orell Talk, Linguaphone software in the Language Laboratory which costs Rs. 2,47,800 and Rs. 4,81,140 respectively. This language lab software is completely server based which is accessed by 60 users at a time. The Language Laboratory software aims at facilitating the learners to attain mastery over English. It enables the students to expedite the process of improving learning skills with emphasis on LSRW skills which lead to desirable employability.
